DETAILED ACTION

The preliminary amendment filed on September 10, 2001, amending the specification, has been entered.

Claims 1-14 are pending.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to a 16S rDNA and bacteria comprising said DNA, classified in class 435, subclass 243.
- II. Claims 6-12, drawn to a method for identifying a dechlorinating bacterial strain, classified in class 435, subclass 243.
- III. Claims 13-14, drawn to a method of dechlorinating chlorinated compounds with Invention I, classified in class 435, subclass 41.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and (II-III) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product of Invention can be used in the method of Invention II or Invention III.

Also, the methods of Invention II-III are patentably distinct as having different effects and utilities.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yong Pak whose telephone number is 703-308-9363. The examiner can normally be reached on Monday through Friday from 8:30 a.m. to 5:00 p.m.
